MILEAGE TRAVELED IN PERSONALLY OWNED AUTOMOBILES

The attention of employees using their own automobiles on official business is invited to the notice appearing in Service and Regulatory Announcements for December, 1923, requiring them to equip their cars with attachments for measuring distance and to state in their accounts, in which claims are made for reimbursement for mileage, that the distance traveled was measured by a speedometer or similar attachment. There is a growing tendency on the part of employees to ignore that part of the instructions requiring them to indicate how mileage claimed was arrived at. This causes unnecessary work and delays the payment of accounts. The requirement is one which is insisted on by the General Accounting Office.
